## PROJECTS

### Magic – A Virtual Assistant

Desktop App which is assist us while performing task such as open any application, search on google, find answer of questions and many more.

Its fully based on Python Language where I use PyQt Designer for design its UI which uses PyQt5 and PiSide 2 module of python and with backend in python.

### Face Recognition Student Management System

Its a team project as a finale year project.

Its based on python, using machine learning algorithms.  
MySQL database is used in it

### Buttistore Website

Its a project that I have done in my internship.  
Using Html, Css, JavaScript, Bootstrap, jQuery etc

### Data Analysis- Employee Data Set

I have done this project in my college hackathon its a team project. This project is based on Data Analysis to find the resultant clean data and show the report of data set.
